NORTHERN VIRGINIA PARADE OF HOMES MAY 15 & 16, 2010

Northern Virginia's largest "Open House" home tour is a two day event that attracts thousands of participants from around the region. It is a free, self-guided tour that is open to the general public and no registration is required.

Many of the area's leading builders and remodelers showcase their innovative ideas, unique design features, dynamic floor plans, and master craftsmanship and lifestyle amenities.

The tour spans five Northern Virginia counties with entry locations ranging from Arlington to Leesburg, and from Springfield to Gainesville. The Parade tour includes homes of every type from condominiums and townhomes to single family homes—from entry level and move-up homes to multi-million dollar mansions, and active adult communities; from production to custom builders and remodelers, and in all types of neighborhoods, communities and price ranges.

The public is invited to visit these homes, presented by leading builders and remodelers to see the latest in design and style, to get interior design ideas, to dream, preview, and shop and enjoy everything the parade has to offer—all free of charge.

Creating an individual tour is easy at www.VAparade.com. Using the website, a personal tour can be automatically created and mapped with driving directions based upon your individual input and sorted by location, home type and price.

The Northern Virginia Building Industry Association (NVBIA) is proud to host the 13th Annual Parade of Homes. Each Parade of Homes participating builder contributes a donation to HomeAid Northern Virginia. These builder contributions to HomeAid Northern Virginia help build and renovate shelters for the homeless and provide much-needed support—especially to children and struggling families.

NVBIA is committed to serving the housing industry and working on behalf of its builder and associate members. See www.nvbia.com for more information.
